

Increasing interest in green VET professions through empowering digital storytelling.

Project Overview

VET professions offer rich opportunities for individuals interested in green technologies, green entrepreneurship, green social business and related environmentally-conscious industries.

These professions and career paths play a key role in the pursuit of a healthier environment and green growth in European economies.

The Green VET Choices project sees its central objective in **developing a way to combine green VET with the fight against climate change** by increasing the attractiveness and awareness of environmentally-friendly VET career options and fostering required green & digital skills and competences.

Call to Action

Climate change concerns everyone and is a very real threat to global society, affecting millions of people and causing natural disasters all over the world.

The European Union is taking **a stand against climate change** and for a greener future, launching **several initiatives such as the European Green Deal.**

The Green VET Choices project joins the fight for a healthier planet by developing and implementing an innovative learning methodology to increase green skills and raise interest in green vocational education and training
